A Tropical Birding
Custom Tour

February 24 - March 1, 2024
Guide: Ken Behrens

TOUR SUMMARY

This is a short and sweet trip designed to take in Baja's small suite of endemic birds, plus some world-class marine experiences, namely Whale Sharks and the world's most approachable Gray Whales. This trip went off without a hitch, and the whole group had a great time. The hotels were comfortable, roads mostly excellent, and the food was fantastic, especially the local seafood. Though some Americans are worried about visiting Mexico, this part of Mexico is incredibly safe, and with friendly local people. It's a great tour if you want to dip your toes into international birding, or if swimming with Whale Shark or being a couple feet from a Gray Whale are on your "bucket list"!

For an immersive experience of this trip's highlights, check out the 5-minute video trip report:
